

Reviving Karanis in 3D

Eiman Elgewely, PhD

Experiential Technologies Center, UCLA

**Kelsey Museum Lecture Hall 434 South State Street
11 a.m. Thursday, May 29, 2014**

This lecture presents the first results of the *Reviving Karanis* research project, which uses digital technologies to reunite archaeological artifacts from the Greco-Roman town of Karanis, Egypt. Today these finds are located in different museums worldwide. The artifacts will be contextualized into a virtual model of the original environment, into an interactive digital display in the museums and will be available online.

This event is free and open to the public
