

Field Archaeology Series on Thursday presents a double-header by

Dr. Jordan Pickett

Post-doctoral Research Fellow

Kelsey Museum and Near Eastern Studies

***Water in Late Antique Ephesus
and
Object-Based Learning
with the Kelsey Experience and TLTC***

Thursday, January 21, 2016

Reception 5:30 pm, Lecture 6:00 pm

Kelsey Museum Lecture Hall

434 South State Street

**FAST lectures are free and open to the public
sponsored by**

**The Interdepartmental Program in Classical Art and Archaeology,
the Department of Classical Studies,
and the Kelsey Museum of Archaeology**

Jordan Pickett (UMich Post-Doc / UPenn PhD '15) will present a fast-paced, double-header lecture for the FAST series. The first 20 minutes will introduce Jordan's recent fieldwork and research on the water infrastructure of Roman and Late Antique Ephesus. This work includes the first-ever study of water pipes and conduits at Ephesus, which describes six centuries of change in the supply, distribution, and consumption of water in one of the most important cities of the Roman world. The second twenty minutes of this FAST lecture provides an overview of the exciting work of the TLTC project here at UMichigan, which is teaching undergraduates – from STEM fields, business, and the humanities alike – to think and ask questions like historians and archaeologists through first-hand experiences and investigations of ancient artifacts at the Kelsey Museum.
